Certification

Web3 Development

Software Development

Education

(Sep 2019 -Dec 2023)
Bachelor Of Science Information and Technology

Professional Summary

Experienced Blockchain Developer adept at integrating blockchain technology into web and mobile applications. Proficient in Solidity,golang and blockchain fundamentals, with a strong focus on user experience and infrastructure optimization. Committed to continuous learning and collaboration, eager to contribute to innovative projects shaping the future of the internet.

Work Experience

HIFADHI

May2024 - present
an open-source microservice DApp platform launched in May 2024, uses blockchain and stablecoins to facilitate secure, transparent fund acquisition for local communities.

EXION

Jan 2023 - November 2024
A self custodian Fintech web3 wallet supporting on and offramp of fiat currency to crypto payments and as well sending and receiving of cryptocurrency (e.g ckes, usdc)

GRANT STACK

August 2024 - December 2024
Contributed to the development of the Grant Stack for the Celo Network as an open-source collaborator, showcasing blockchain expertise. Supported the enhancement of grant management solutions, advancing transparency and efficiency within the Celo ecosystem

ATLAS

Dec 2023 - June 2024
Open Sourcing Land Registration Project which integrates Blockchain technology to record land references and prevent land theft, integrating with Celo Network.

CELO AFRICA DAO

October 2023 - December 2024
Developed a DApp solution tailored for the Celo Africa DAO, steering the team through product ideation and execution phases, showcasing deep blockchain expertise. Led the successful deployment of the Celo Africa DAO project, highlighting a steadfast commitment to advancing financial inclusion and empowerment within the African community

LISK LAYER2 ChAIN

Jan 2024- August 2024
Contributed to the development of the Lisk Scaffold, facilitating streamlined DApp creation on the Lisk chain. Collaborated with the team in refining and optimizing the scaffold for enhanced developer experience. Played a pivotal role in advancing DApp innovation within the Lisk ecosystem.

CELO KENYA

May 2022 to December 2022
I worked as a blockchain intern at Celokenya, where I gained hands-on experience in developing blockchain solutions and contributing to the company's blockchain initiatives
